

2025

1 Year = 365 Opportunities

Name: Sanjosh Biswas

Class: MCA 4th Sem.

Reg No : 2305260021

project Synopsis of project Diary

January

2023

13 MON

013-352

check all the setup are available or not. If not then we installed it check the various of java and other things that requested for steering boat based height.

14 TUE

014-351

Decide project name , design our logo and theme color , what color our website have.

January 2023

2025

January

WED

15

016-350

study about landing page, PLP
(product listing page),
PDP (product description page) and
make a overview this.

THU

16

016-349

start designing home page using html,
css and js so make
responsive and logo, header, footer
sections etc

Sundays
17.01.25

2025

January

MON

20

020-345

where which folder should be created
and which file will be created that
we studied about and why it will
be created there that we studies.

TUE

21

021-344

As my project is a ^{Blocking} ~~complex~~ site
so I decided that what type
of user will be there so that
I can handle it smoothly.

February 2025

9 10 11 12 13 14 15

16 17 18 19 20 21 22

23 24 25 26 27 28

January

2023

22 WED

start developing PLP and PDP
page simultaneously that page
we have navigation bar
Search bar, and etc.

Omran
23.01.25

23 THU

023-342

we study about using Fragment by
the help of this the
code reusability will be happens.
and it will looks better.

January

January

20:

27

MON

027-336

we do all the setup of git
then we study about push
and pull to the git.

28

TUE

028-337

we study about EER diagram so
that we can apply it and
enhance the entity relationship.

26	27	28	29	30	31	

2025

January

We create script .sql folder ^{WED} 29
here we can write the queries ⁰³⁰⁻³³⁶
for all the table we have and
create database.

We study about my sql work ^{THU} 30
bench and then we can
see our database all tables and
which data will be comes from
banks.

Ramdas

2025

February

we study about controller
where all the pages will
call and closed objects will be
created. for all the things for
backend.

MON

034-331

03

TUE

035-330

04

we study about Repository class
where postviews will be created
and we will protect it from
IPA.

February 2025

23 24 25 26 27 28

February

2025

05 WED

we study about git branch
where we can create different
other branches except main
branches for reduce conflicts.

06 THU

037-328

we design login page for
user and admin where when
user will sing up data will
store in database.

2025

February

After that we know about upload ^{WED} 12
folder whether i can add file ⁰⁴³⁻³²²
images at dashboard and it
will automatically come in that
folder and it will store at
database as well those at database
as well help we can find the
status dynamically from backend.

Somruddh
13.02.25

15 SAT

046-319

After adding all the category and products up to the 'Jatu Pro' ~~watch~~ with search will redirect to first PLP page.

16 SUN

February

Su	Mo	Tu	We	Th	Fr	Sa
1	2	3	4	5	6	7

23	24	25	26	27	28	29

2025

February

FRI

21

Adding calligraphies in a admin dashboard
for user page and this specific user
at first uploaded this image as
well as which is dynamically fetch
from backend.

SAT

053-312

22

After adding widget there we

study about Backpage where if only one
member can have access of data
of database then it will exchange
the data from each other.

SUN 23

March

2025
